THURSDAY

1530-1615  CLERK TEACHING SESSION - Victory 2, Library
Hypothermia
Dr. D. Mark

FRIDAY

0700  CASE MANAGEMENT ROUNDS
Anesthesia Library
Dr. Dana Zoratto

Case for Discussion:
Your next patient on the emergency board is a 53 year old woman
who presented to the emergency department with hematemesis
and melena stools. She has a hoarse voice and had a URTI
earlier in the week. They were unable to perform upper
endoscopy with sedation and would like to bring her to the OR for
an upper endoscopy. How would you assess this patient?
