

<i>During Evaluation</i>	<i>Treat possible contributing factors:</i>	
• Secure, verify airway and vascular access when possible	- Hypovolemia	- Toxins
• Consider expert consultation	- Hypoxia	- Tamponade, cardiac
• Prepare for cardioversion	- Hydrogen ion (acidosis)	- Tension pneumothorax
	- Hypo-/hyperkalemia	- Thrombosis (coronary or pulmonary)
	- Hypoglycemia	- Trauma (hypovolemia)
	- Hypothermia
